Printing and display program «10 Lane Command Desk»

«10 Lane Command Desk» enables the connection of up to 10 control units directly to a PC with printer (additional to the Central-PC). When used, individual thermal printers can be replaced by a single laser printer. The printout of the shooting program is made automatically after the last shot or manually by the shooter. «10 Lane Command Desk» enables the display of the connected shooting lanes for the spectators as well. The type of display can be chosen individually according to the own personal needs.

1:1 printout analogous to individual thermal printer

Colour print-out with shot pattern
